

Functional Requirements

Public Pages

- Home (value proposition, CTA)
- About
- Loan Products (basic info)
- Apply for Loan (form)
- Contact

Loan Application Form

- Personal details (name, phone, email)
- Loan amount & tenure
- Employment / business type
- Upload documents (ID, bank statement)
- Submit + confirmation message

Admin (Very Basic)

- View submitted applications (table)
- Export to Excel / CSV/PDF
- Email notification on new submission

Non-Negotiables

- Mobile responsive
- Fast loading
- HTTPS
- Basic spam protection (CAPTCHA or honeypot)

2. Tech Stack (Simple & Fast)

Frontend

Option A – Fastest (Recommended)

HTML5

Tailwind CSS (responsive out of the box)

Vanilla JavaScript

Option B – Slightly modern, still simple

Next.js (React)

Tailwind CSS

If no dynamic UI needed, Option A is enough.

Backend (Form Handling)

Best Simple Options

Node.js + Express

OR Serverless (Firebase / Supabase / Vercel Functions)

What backend does

- Receive form submissions
- Validate data
- Save to database
- Send email notification

Email Notifications

Resend

SendGrid

OR simple SMTP (Gmail / Outlook)
